# Company Overview.

## Introduction

Hillarich Business Machines Ltd is a Nigerian engineering and stadium-technology company specializing in the design, construction, and equipping of modern sports facilities to international standards.

The company delivers both new-build and upgrade projects, integrating infrastructure that enhances spectator safety, revenue accountability, access control, lighting, digital visibility, and overall facility security.

Hillarich is a duly registered Nigerian limited liability company compliant with statutory regulations governing public procurement and civil works in Nigeria.

## Core Competencies.

- Architectural design and master planning of stadiums
- Civil & structural engineering for new construction, renovation and expansion
- Installation of grandstands and spectator seating systems
- LED scoreboards and giant digital displays
- Stadium floodlighting and high-mast illumination
- Turnstile access systems (full-height and waist-height) with ATM/QR integration
- Parking systems & vehicular revenue control
- Security bollards (automatic & fixed crash-rated systems)
- CCTV surveillance and command-control integration
- Natural and artificial turf construction
- Public Address (PA) & emergency voice evacuation systems

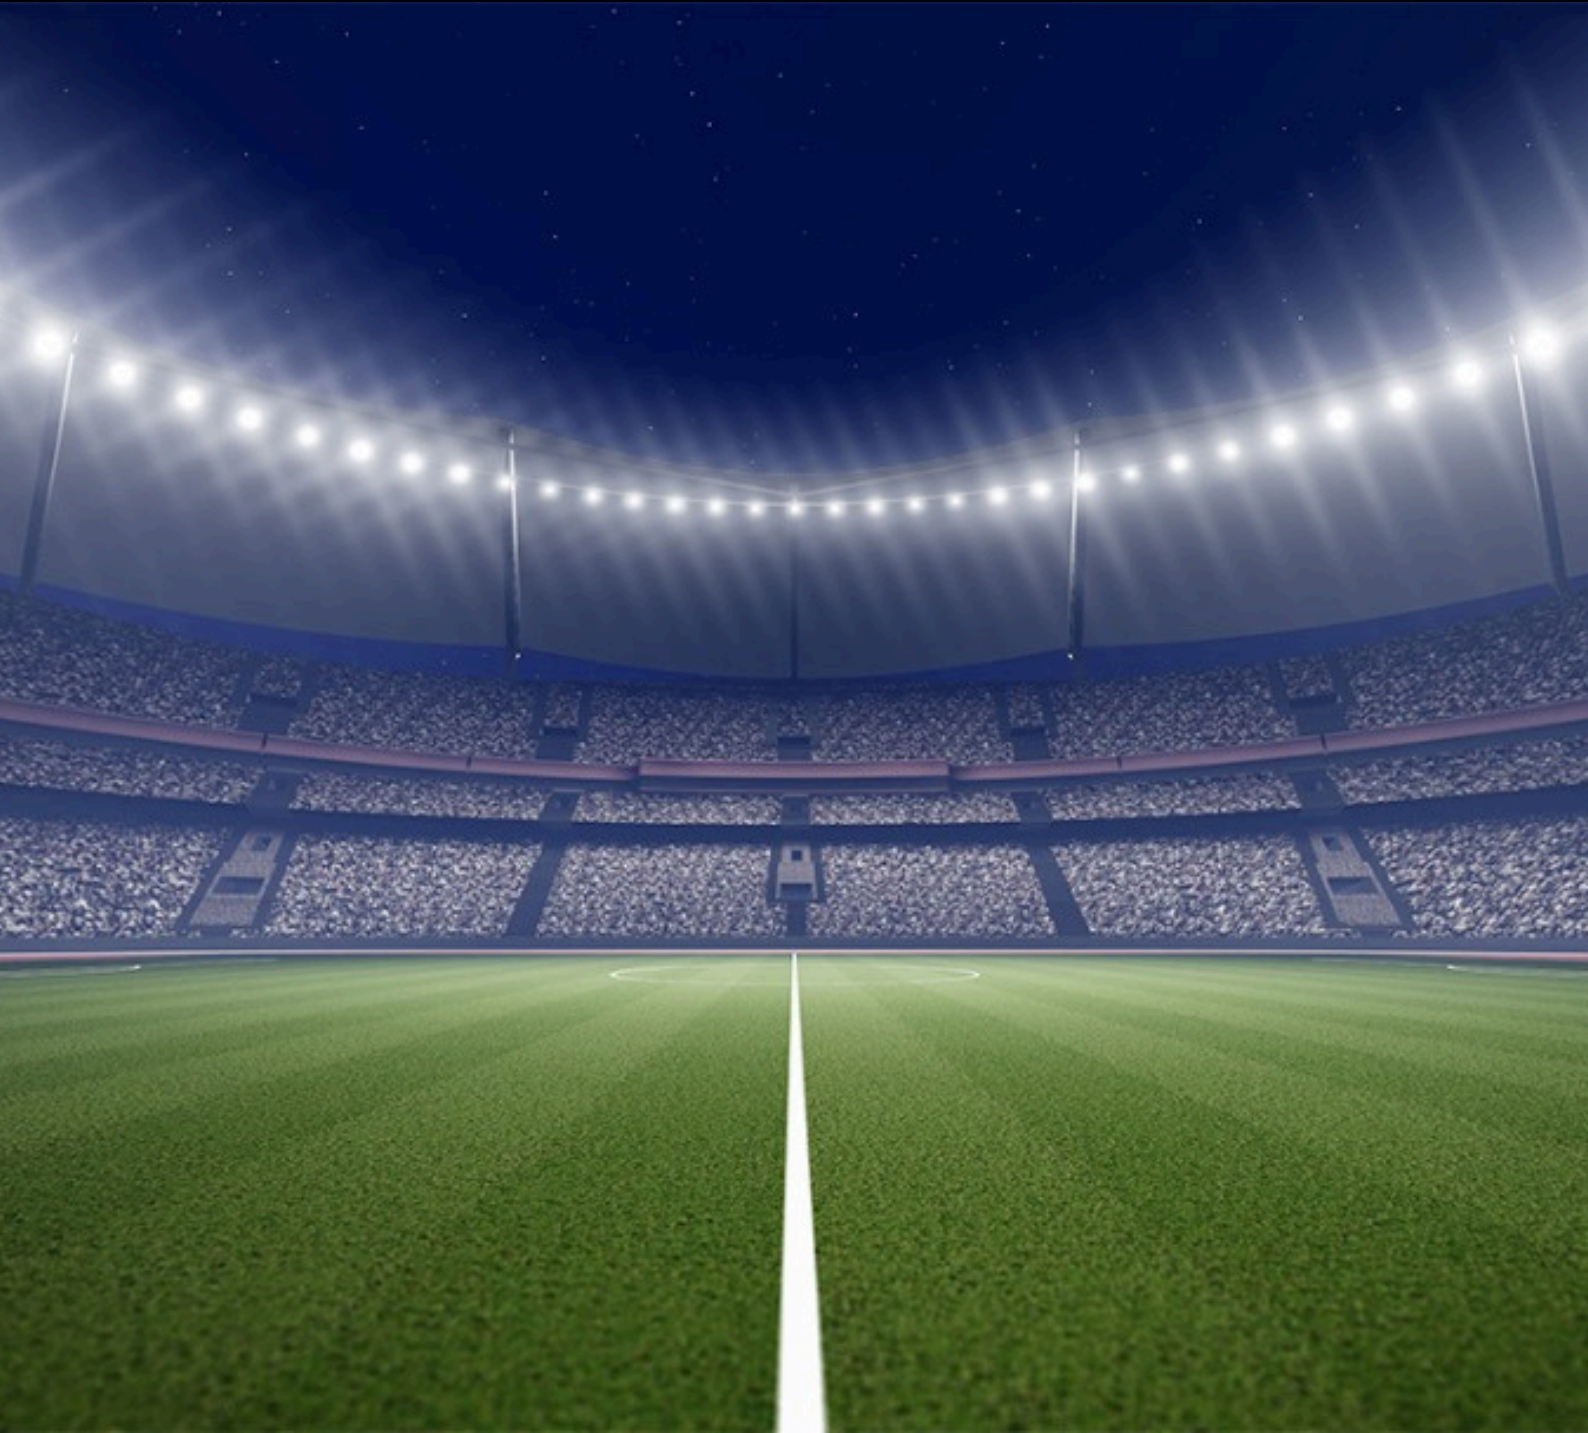

## Turnstile Access Control Systems

Turnstiles are used worldwide for spectator entry management in stadiums. Modern units integrate ATM cards, RFID tickets, QR codes or biometric credentials to eliminate ticket fraud and provide accurate population counts.

## LED Scoreboards and Digital Display Systems

Turnstiles are used worldwide for spectator entry management in stadiums. Modern units integrate ATM cards, RFID tickets, QR codes or biometric credentials to eliminate ticket fraud and provide accurate population counts.

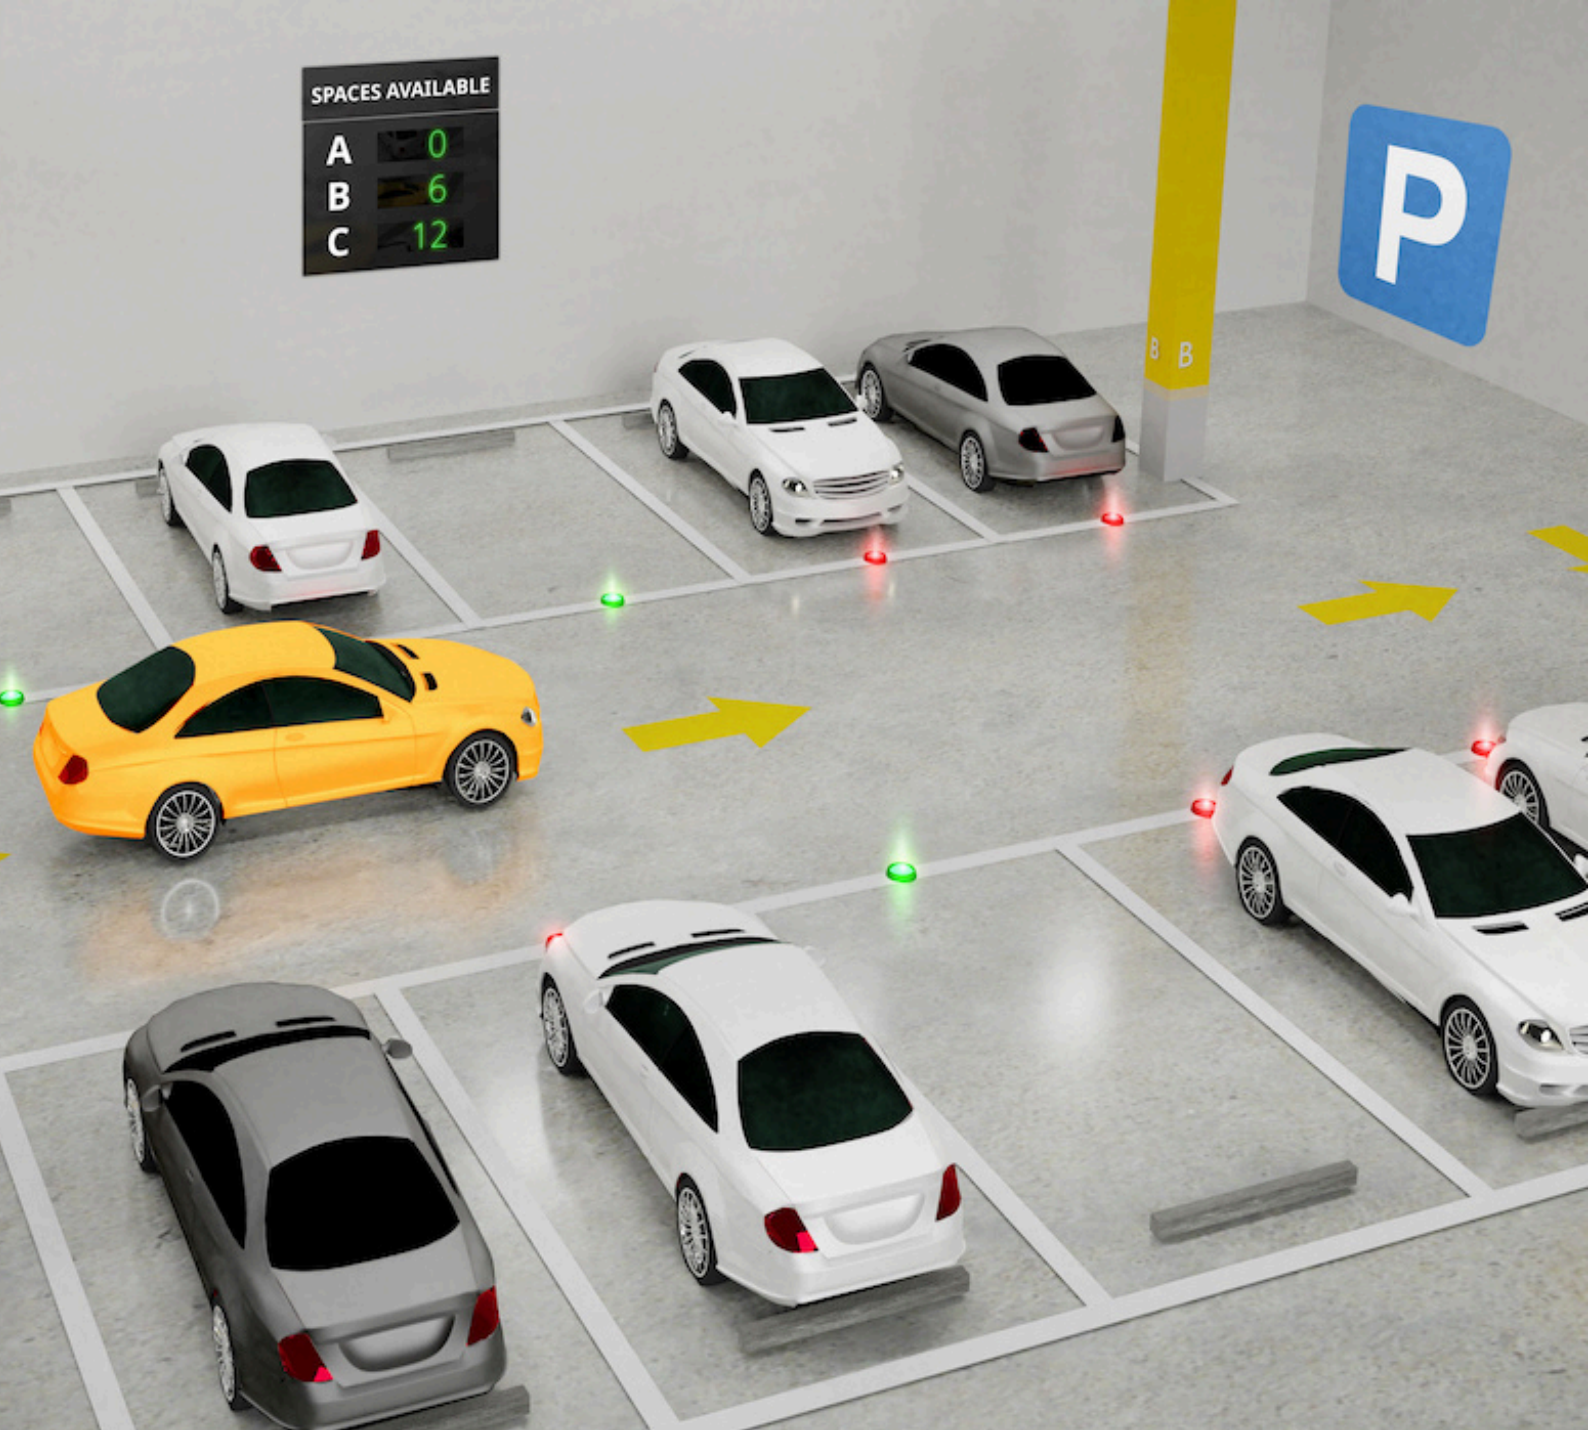

## **Floodlighting & High-Mast Lighting**

Broadcast-grade floodlights ensure event visibility for players, officials, spectators and digital coverage. Systems are engineered for uniform lux distribution across the pitch.

## Security Bollards (Automatic & Fixed)

Crash-rated bollards prevent forced vehicle intrusion at stadium gates, VIP circulation zones and public approach ways. Retractable models integrate with access-control logic.

## Parking & Revenue Control Systems

Automated vehicle access using LPR (license plate recognition), RFID tags or ATM integration reduces leakages and enhances audit transparency.

## **Surveillance & PA Systems**

CCTV and PA systems ensure crowd supervision, threat detection, compliance monitoring and coordinated evacuation where necessary.

## Barrier Gate

A barrier gate is a security system used to control vehicle access, featuring a movable arm that blocks or allows entry.

## Competitive Strengths.

- Delivered systems at major national stadiums
- Technology that eliminates fraud and enhances security
- Durable materials designed for African climate conditions
- Partnerships with globally certified OEMs
- Compliance with FIFA / CAF / broadcast engineering guidelines

## After-Sales, Maintenance & Technical Support

Hillarich provides full operational support post-installation, including:

- Scheduled preventive and corrective maintenance
- Replacement of critical components and consumables
- Operational training for facility personnel
- Remote & on-site technical support
- Warranty coverage in line with OEM provisions

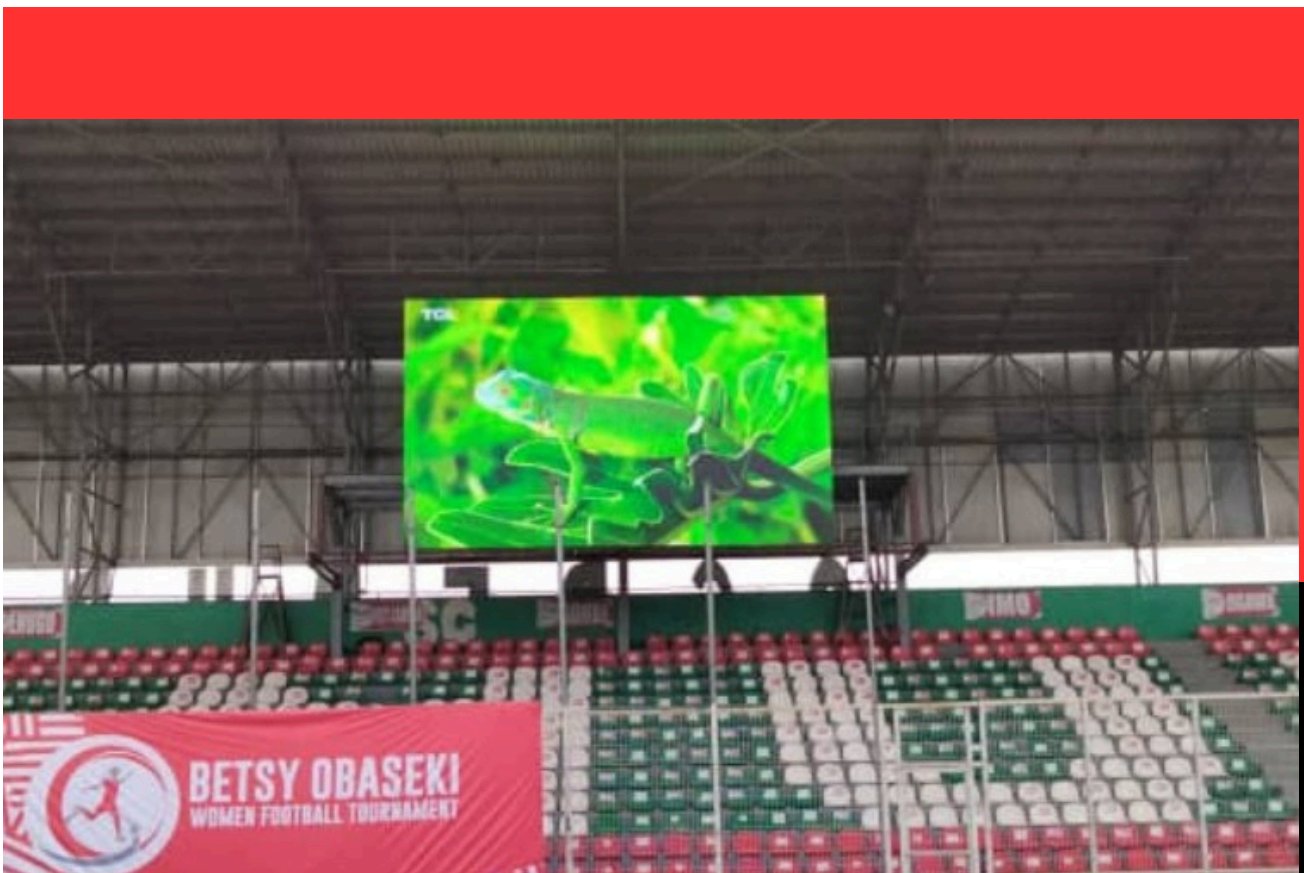

# Reference Projects.

## Samuel Ogbemudia Stadium — Benin City

At the iconic Samuel Ogbemudia Stadium in Benin City, we proudly delivered a world-class scoreboard installation for the Betsy Obaseki Women Football Tournament. This project reflects our dedication to enhancing the sports experience through innovation and precision.

The high-definition LED display ensures clear visibility from every angle, providing players and fans with an immersive match-day experience. Its real-time scoring system keeps the excitement alive throughout every game.

Built with a durable, weather-resistant design, the scoreboard guarantees consistent performance under any condition—setting a new standard for excellence in sports technology.

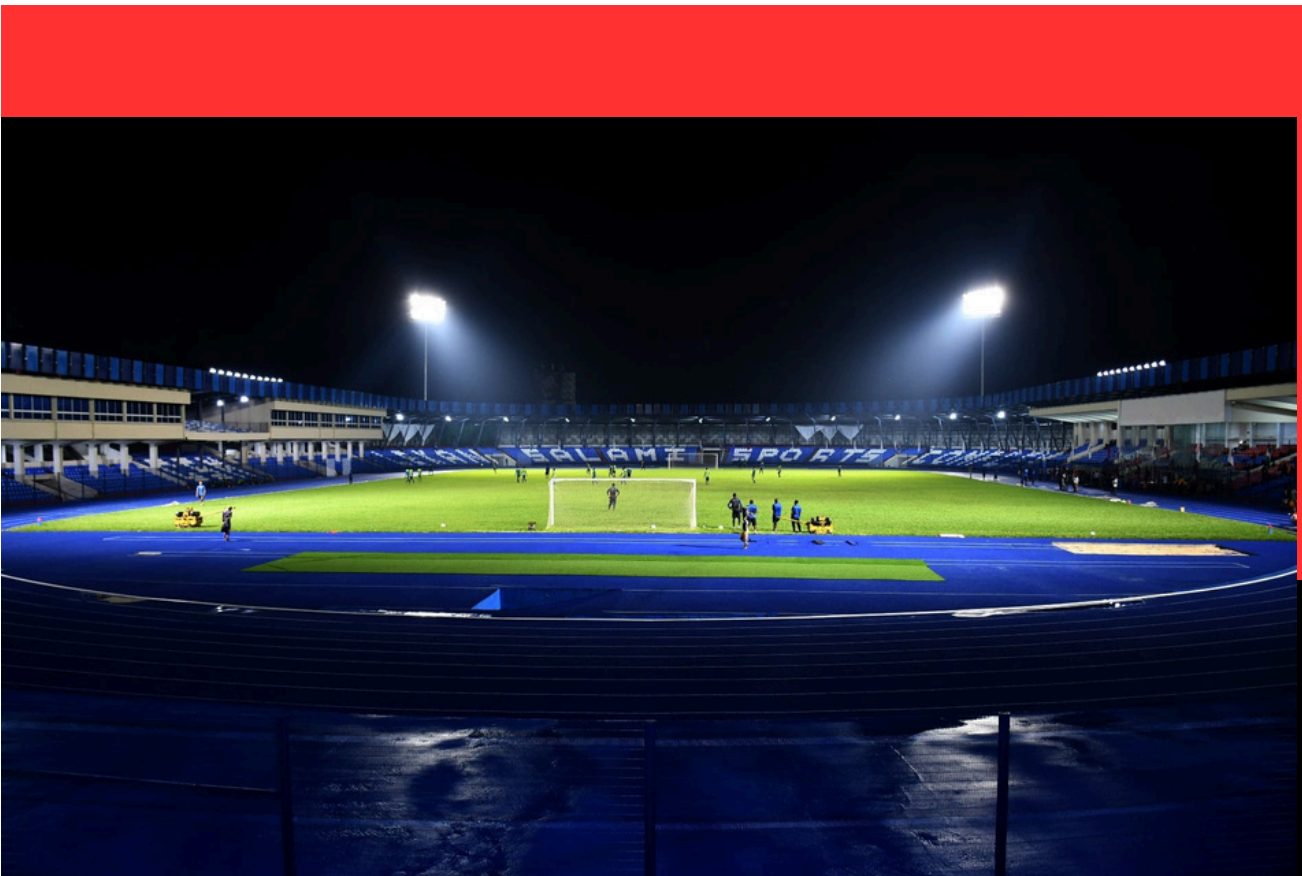

# Reference Projects.

## Lekan Salami Stadium — Ibadan

At the renowned Lekan Salami Stadium in Ibadan, we successfully upgraded the floodlighting system to deliver superior brightness and energy efficiency. This project showcases our commitment to enhancing visibility and safety for both players and spectators.

Our advanced LED floodlights provide powerful illumination that meets international sporting standards, ensuring clear visibility during night matches and events.

Designed for durability and low maintenance, the system offers long-lasting performance, reduced energy consumption, and reliable operation in all weather conditions.

# Reference Projects.

## M.K.O Abiola National Stadium — Abuja

At the prestigious M.K.O Abiola National Stadium in Abuja, our expert team ensures seamless entry management through professional turnstile maintenance services. We take pride in maintaining world-class standards for performance, reliability, and crowd control.

Our preventive maintenance program keeps the systems running smoothly, minimizing downtime and enhancing visitor experience. In addition, we offer 24/7 emergency support to address any operational issues swiftly and efficiently.

From component replacement to full system optimization, our maintenance solutions guarantee secure, efficient, and uninterrupted stadium access during every event.
